List of Contents

NUMBER 1

	1	Editorial
W. B. Zimmerman	7	The drag on sedimenting discs in broadside motion in tubes
G. A. Rogerson and **K. J. Sandiford**	23	Some comments on the dispersion relation for periodically layered pre-stressed elastic media
F. Birbir, A. Büyükaksoy and **V. P. Chumachenko**	51	Wiener–Hopf analysis of the two-dimensional box-like horn radiator
A. Charalambopoulos, G. Dassios, G. Perrusson and **D. Lesselier**	67	The localized nonlinear approximation in ellipsoidal geometry: a novel approach to the low-frequency scattering problem
M. Rudnicki	93	Eigenvalue solutions for free motion of electroconductive plate in magnetic field

NUMBER 2

R. Quintanilla	109	On the spatial decay for the dynamical problem of thermo-microstretch elastic solids
V. Berdichevsky	123	On statistical mechanics of vortex lines
X.-F. Li and **T.-Y. Fan**	131	Transient analysis of a piezoelectric strip with a permeable crack under anti-plane impact loads
P. D. Ariel	145	On extra boundary condition in the stagnation point flow of a second grade fluid
M. Trifa, F. Auslender and **F. Sidoroff**	163	Nanorheological analysis of the sphere plane contact problem with interfacial films
M. S. Dokuz	177	Thermostatics of an infinite mixture of two elastic solids and a spherical thermal inclusion problem
G. Degan and **P. Vasseur**	193	Aiding mixed convection through a vertical anisotropic porous channel with oblique principal axes
M. S. Dokuz and **İ. T. Gürgöze**	211	The Galerkin vector solution for a mixture of two elastic solids and Boussinesq problem
G. Dassios and **M. Hadjinicolaou**	223	Multipole expansions in Stokes flow

PII: S0020-7225(02)00264-1

NUMBER 3

X. Yin and **X. Wang**	231	On circular elastic rods as nonlinear springs and gripper elements
C.-O. Ng	239	On the longitudinal dispersion of heavy particles in a horizontal circular pipe
A. Uçar	251	A prototype model for chaos studies
M. El Jarroudi	259	Boundary homogenization for a quasi-linear elliptic problem
M. A. Ezzat, M. I. Othman and **A. S. El-Karamany**	283	State space approach to generalized thermo-viscoelasticity with two relaxation times
Z.-G. Zhou and **B. Wang**	303	The scattering of harmonic elastic anti-plane shear waves by a Griffith crack in a piezoelectric material plane by using the non-local theory
A. R. F. Elhefnawy	319	Nonlinear electrohydrodynamic instability of two liquid layers
A. L. Kalamkarov, G. Duvaut and **F. Léné**	333	A new asymptotic model of flexible composite shells of a regular structure

NUMBER 4

C. N. Duong and **J. Yu**	347	Stress analysis of a bonded repair over a corrosion grind-out using an inclusion model with a second ordered eigenstrain theory
M. Grzywiński and **A. Służalec**	367	Stochastic equations of rigid-thermo-viscoplasticity in metal forming process
L. E. Payne and **J. C. Song**	385	Growth and decay in generalized thermoelasticity
A. Scalia	401	Contact problem for porous elastic strip
M. Kumari and **G. Nath**	411	Unsteady flow and heat transfer of a viscous fluid in the stagnation region of a three-dimensional body with a magnetic field
M. Dehghan	433	Fourth-order techniques for identifying a control parameter in the parabolic equations
A. Abraham	449	Rayleigh–Benard convection in a micropolar ferromagnetic fluid

K. C. Chen and **C. S. Yeh** 461 Description of magnetorheological behavior with internal variables

483 Announcement

NUMBER 5

M. Ciarletta 485 On the spatial behaviour of the transient and steady-state solutions in thin plates with transverse shear deformation

J. G. Murphy and **G. A. Rogerson** 499 A method to model simple tension experiments using finite elasticity theory with an application to some polyurethane foams

V. A. Papathanasopoulou, D. I. Fotiadis, G. Foutsitzi and **C. V. Massalas** 511 A poroelastic bone model for internal remodeling

W. T. Cheng and **H. T. Lin** 531 Non-similarity solution and correlation of transient heat transfer in laminar boundary layer flow over a wedge

D. Ieşan 549 On the micromorphic thermoelasticity

J. H. Chang and **L. K. Kang** 569 Evaluation of the stress field around a notch tip using contour integrals

H. H. Sherief and **K. A. Helmy** 587 A two-dimensional problem for a half-space in magneto-thermoelasticity with thermal relaxation

NUMBER 6

N. D. Cristescu, B. P. Conrad and **R. Tran-Son-Tay** 605 A closed form solution for falling cylinder viscometers

B. J. Chen, Z. M. Xiao and **K. M. Liew** 621 Electro-elastic stress analysis for a wedge-shaped crack interacting with a screw dislocation in piezoelectric solid

B. Jin and **Z. Zhong** 637 Dynamic stress intensity factor (Mode I) of a penny-shaped crack in an infinite poroelastic solid

T. J. Pence and **H. Tsai** 647 Interaction of harmonic plane waves with a mobile elastic phase boundary in anti-plane shear

Y. Huang, C. Wu, F. Wu and **F. Guo** 673 Traveling wave solution of heat transfer for small sample moving in the sub-cooled liquid nitrogen

S. Smolentsev, M. Abdou, N. Morley, A. Ying and T. Kunugi — 693 — Application of the "K–ε" model to open channel flows in a magnetic field

NUMBER 7

H. Demiray — 713 — Nonlinear waves in a prestressed elastic tube filled with a layered fluid

M. G. Naso and E. Vuk — 727 — Uniform attractors for a semilinear evolution problem in hereditary simple fluids

K. Ikeda, K. Oide and K. Terada — 743 — Imperfection sensitive variation of critical loads at hilltop bifurcation point

M. S. Malashetty and S. N. Gaikwad — 773 — Effect of cross diffusion on double diffusive convection in the presence of horizontal gradients

M.-S. Chung, K.-S. Chang and S.-J. Lee — 789 — Numerical solution of hyperbolic two-fluid two-phase flow model with non-reflecting boundary conditions

S. M. Klisch — 805 — A mixture of elastic materials with different constituent temperatures and internal constraints

NUMBER 8

A. Gachkevich, T. Kournyts'kyi and R. Terletskii — 829 — Investigation of molecular gas admixture diffusion, heat transfer and stress state in amorphous solid subjected to thermal infrared radiation

F. T. Akyildiz — 859 — Dispersion of a solute in a Poiseuille flow of a viscoelastic fluid

M. S. Wu — 873 — Stress and strain energy of a periodic array of interfacial wedge disclination dipoles in a transversely isotropic bicrystal

G. Venkov — 899 — Scattering of electromagnetic waves by a coated not perfectly conducting sphere

P. D. Ariel — 913 — On exact solutions of flow problems of a second grade fluid through two parallel porous walls

NUMBER 9

L. E. Payne and J. C. Song — 943 — Spatial decay bounds for the Forchheimer equations

G. Aşkar Altay and M. Cengiz Dökmeci — 957 — High-frequency equations for non-linear vibrations of thermo-piezoelectric shells

A. Warlock, H.-K. Ching, A. K. Kapila and **R. C. Batra**	991	Plane-strain deformation of an elastic material compressed in a rough rectangular cavity
Yang Lizhong, Chen Xiaojun, Zhou Xiaodong and **Fan Weicheng**	1011	A modified model of pyrolysis for charring materials in fire
Z.-G. Zhou, B. Wang and **S.-Y. Du**	1023	Analysis of the dynamic behavior of two parallel symmetric cracks using the non-local theory
K. Yasuda, N. Mori and **K. Nakamura**	1037	A new visualization technique for short fibers in a slit flow of fiber suspensions
M. Maiellaro and **A. Labianca**	1053	On the nonlinear stability in anisotropic MHD with application to Couette–Poiseuille flows

NUMBER 10

X. Wang and **Y.-p. Shen**	1069	The general solution of three-dimensional problems in magnetoelectroelastic media
T. He, X. Tian and **Y. P. Shen**	1081	State space approach to one-dimensional thermal shock problem for a semi-infinite piezoelectric rod
A. Charalambopoulos and **G. Dassios**	1099	Complete decomposition of axisymmetric Stokes flow
J. Awrejcewicz and **Yu. Pyryev**	1113	Thermoelastic contact of a rotating shaft with a rigid bush in conditions of bush wear and stick-slip movements
B. Lazzari and **R. Nibbi**	1131	Sufficient conditions for the exponential stability in linear conductors with memory
J.-L. Auriault, P. Royer and **C. Geindreau**	1151	Filtration law for power-law fluids in anisotropic porous media
C. Proppe	1165	The Wong–Zakai theorem for dynamical systems with parametric Poisson white noise excitation

NUMBER 11

N. Antar	1179	The Korteweg–de Vries–Burgers hierarchy in fluid-filled elastic tubes
F. Diele, F. Notarnicola and **I. Sgura**	1199	Uniform air velocity field for a bioventing system design: some numerical results

C. Galeş 1211 Some uniqueness and continuous dependence results in the theory of swelling porous elastic soils

M. Mongi and **S. Hassan** 1233 Homogenization of a heat transfer problem in a highly heterogeneous periodic medium

M. A. Ezzat, M. I. Othman and **A. M. S. El-Karamany** 1251 State space approach to two-dimensional generalized thermo-viscoelasticity with two relaxation times

M. A. Ezzat and **A. S. El-Karamany** 1275 The uniqueness and reciprocity theorems for generalized thermo-viscoelasticity with two relaxation times

NUMBER 12

Y. Guemouri, C. Meuris and **M. El Khomssi** 1285 Stability criterion and stationary states in a superconducting wire of limited length

D. Ambrosi and **F. Mollica** 1297 On the mechanics of a growing tumor

E. Scarpetta 1317 Minimum principles for the bending problem of elastic plates with voids

M. I. A. Othman, M. A. Ezzat, S. A. Zaki and **A. S. El-Karamany** 1329 Generalized thermo-viscoelastic plane waves with two relaxation times

V.-G. Lee 1349 Evaluation of the three-dimensional elastic Green's function in anisotropic cubic media

P. D. Gosling and **L. Liu** 1363 Total Lagrangian perspectives on analytical sensitivities for flexible beams

G. Yossifon, A. L. Yarin and **M. B. Rubin** 1381 Penetration of a rigid projectile into a multi-layered target: theory and numerical computations

J.-H. He 1403 A variational principle for magnetohydrodynamics with high Hartmann number flow

NUMBER 13

M. Romeo 1411 A time domain approach to SH waves on a piezoelectric layer

O. G. Rzayev and **S. D. Akbarov** 1435 Local buckling of the elastic and viscoelastic coating around the penny-shaped interface crack

Z. Y. Ai, Z. Q. Yue, L. G. Tham and **M. Yang** 1453 Extended Sneddon and Muki solutions for multilayered elastic materials

R. Quintanilla	1485	On the linear problem of swelling porous elastic soils with incompressible fluid
S. Mahmud, A. K. M. S. Islam and **M. A. H. Mamun**	1495	Separation characteristics of fluid flow inside two parallel plates with wavy surface
H. S. Takhar, A. J. Chamkha and **G. Nath**	1511	MHD flow over a moving plate in a rotating fluid with magnetic field, hall currents and free stream velocity
A. J. M. Spencer and **N. J. Bradley**	1529	Gravity flow of granular materials in contracting cylinders and tapered tubes

NUMBER 14

R. M. McMeeking and **C. M. Landis**	1553	A phenomenological multi-axial constitutive law for switching in polycrystalline ferroelectric ceramics
X. X. Hu, T. Sakiyama, H. Matsuda and **C. Morita**	1579	Vibration analysis of twisted conical shells will tapered thickness
M. B. Abd-el-Malek, N. A. Badran and **H. S. Hassan**	1599	Solution of the Rayleigh problem for a power law non-Newtonian conducting fluid via group method
M. B. Taghite, K. Taous and **G. Maurice**	1611	Heat equation in a perforated composite plate; influence of a coating
H. Y. Yu, Y. N. Wei and **F. P. Chiang**	1647	Load transfer at imperfect interfaces-dislocation-like model
	1663	Book review

NUMBER 15

B. J. Chen, Z. M. Xiao and **K. M. Liew**	1665	A screw dislocation in a piezoelectric bi-material wedge
Th. Koureas, A. Charalambopoulos and **V. K. Kalpakides**	1687	On conservation laws in generalized dynamic thermoelasticity
B. L. Wang and **Y. W. Mai**	1697	Fracture of a piezoelectric material layer bonded by two elastic layers
A. Birinci	1729	Axisymmetric crack problem of a thick-walled Cylinder with cladding

X.-F. Wu and **Y. A. Dzenis**	1751	Closed-form solution for the size of plastic zone in an edge-cracked strip
J. Chen, Z. Liu and **Z. Zou**	1761	Transient internal crack problem for a nonhomogeneous orthotropic strip (Mode I)
A. Kotousov and **C. H. Wang**	1775	Fundamental solutions for the generalised plane strain theory

NUMBER 16

K. Vajravelu, J. R. Cannon, D. Rollins and **J. Leto**	1791	On solutions of some non-linear differential equations arising in third grade fluid flows
C. Wei and **K. K. Muraleetharan**	1807	A continuum theory of porous media saturated by multiple immiscible fluids: I. Linear poroelasticity
C. Wei and **K. K. Muraleetharan**	1835	A continuum theory of porous media saturated by multiple immiscible fluids: II. Lagrangian description and variational structure
K. E. Lonngren and **E.-W. Bai**	1855	On the Uçar prototype model
D. Ieşan	1859	On the theory of heat conduction in micromorphic continua
D. O. A. Cruz	1879	On Kaplun limits and the generalized boundary layer theory
	1895	Book review

NUMBER 17

H. Demiray	1897	Modulation of nonlinear waves in a viscous fluid contained in a tapered elastic tube
D. E. Adams and **M. Nataraju**	1919	A nonlinear dynamical systems framework for structural diagnosis and prognosis
A. S. El-Karamany and **M. A. Ezzat**	1943	On the boundary integral formulation of thermo-viscoelasticity theory
X. Wang, Y.-H. Zhou and **X. Zheng**	1957	A generalized variational model of magneto-thermo- elasticity for nonlinearly magnetized ferroelastic bodies
G. Dassios, K. Karveli, S. E. Kattis and **N. Kathreptas**	1975	The disturbance of a plane dyadic wave by a small spherical cavity

NUMBER 18

M. Benzirar, M. Elhammouti, A. Yeznasni, J. Meziane and **M. Mestari**	2001	Calculation of the diffusion coefficient in a heated turbulent medium using optimisation techniques
S. Barış	2023	Some simple unsteady unidirectional flows of a binary mixture of incompressible Newtonian fluids
E. Sawaya, N. Ghaddar and **F. Chaaban**	2041	Evaluation of the Hall parameter of electrolyte solutions in thermosyphonic MHD flow
J. P. Nowacki, V. I. Alshits and **A. Radowicz**	2057	2D electro-elastic fields in a piezoelectric layer–substrate structure
K. L. Verma	2077	On the propagation of waves in layered anisotropic media in generalized thermoelasticity

NUMBER 19

A. S. El-Karamany	2097	Uniqueness and reciprocity theorems in generalized linear micropolar thermoviscoelasticity
H. M. Park, W. J. Lee and **J. S. Chung**	2119	Boundary optimal control of the Navier–Stokes equations—a numerical approach
Z. M. Xiao, B. J. Chen and **C. R. Steele**	2137	An edge dislocation interacting with a slightly wavy interface
J.-S. Le Brizaut and **M. Pogu**	2163	A mixed non-linear boundary value problem appearing in gas dynamics: generalized solutions and numerical results
E. Pruchnicki	2183	Nonlinearly elastic membrane model for heterogeneous plates: a formal asymptotic approach by using a new double scale variational formulation

NUMBER 20

Y. Kang, C. Yang and **X. Huang**	2203	Dynamic aspects of electroosmotic flow in a cylindrical microcapillary
Y. Z. Chen	2223	General solution for arc crack problem in thermoelastic medium
A. Ktena, D. I. Fotiadis, P. D. Spanos, A. Berger and **C. V. Massalas**	2235	Identification of 1D and 2D Preisach models for ferromagnets and shape memory alloys

H. Tianhu, T. Xiaogeng and **S. Yapeng** 2249 Two-dimensional generalized thermal shock problem of a thick piezoelectric plate of infinite extent

A. Elías-Zúñiga and **M. F. Beatty** 2265 Constitutive equations for amended non-Gaussian network models of rubber elasticity
